## Acknowledgements

The Editors would like to thank Mario Ruggier for preparing the FrameMaker template upon which this document is based. The Editors also warmly thank Richard Cook, Michele Jouhet, Susan Leech-O'Neale and Janice Navarria for copy-editing the document, as well as the CERN Print-shop staff for the helpful, friendly and efficient service.

The level-1 trigger groups thank the rest of the ATLAS Collaboration for their help and advice in the preparation of this TDR, and for their cooperation in beam test evaluations of the trigger. In particular we thank the other ATLAS sub-systems for their assistance in reviewing the design presented here. We also wish to acknowledge the help of B.G. Taylor and the RD12 project group with whom we work closely on the Timing, Trigger and Control system.

The participating institutes would like to express their gratitude to their support staff for the invaluable help in designing and prototyping the many parts of the level-1 trigger. Finally, we wish to thank the following individuals who participated in the demonstrator prototyping work upon which the level-1 trigger design is based: A. Agapow, R. Carney, J. Leake, G.C. Lewis, A. J. Maddox, A. Mass, B. Niemann, D. Rees.

## Revision Record

. . . . .	ii
<b>ATLAS Collaboration . . . . .</b>	<b>iii</b>
<b>Acknowledgements . . . . .</b>	<b>vii</b>
<b>Revision Record . . . . .</b>	<b>vii</b>
<b>1 Introduction . . . . .</b>	<b>1</b>
1.1 Purpose and scope of the TDR . . . . .	1
1.2 Organization of the TDR . . . . .	1
1.3 References . . . . .	2
<b>2 General description of the level-1 trigger system . . . . .</b>	<b>3</b>
2.1 ATLAS trigger and data-acquisition system overview . . . . .	3
2.2 Overview of level-1 trigger system . . . . .	7
2.2.1 Calorimeter trigger . . . . .	9
2.2.2 Muon trigger . . . . .	10
2.2.3 Central Trigger Processor. . . . .	10
2.2.4 Timing, Trigger and Control distribution system . . . . .	11
2.3 Summary of requirements for the level-1 trigger . . . . .	11
2.3.1 General requirements . . . . .	11
2.3.2 Physics requirements . . . . .	11
2.3.3 Measurement of trigger acceptance and efficiency . . . . .	12
2.3.4 Rate and background rejection . . . . .	13
2.3.5 Latency . . . . .	13
2.3.6 Bunch-crossing identification . . . . .	14
2.3.7 Timing calibration . . . . .	14
2.3.8 Processing and transmission errors . . . . .	14
2.3.9 Operation of equipment in the experiment cavern . . . . .	14
2.3.10 Other requirements on the LVL1 trigger . . . . .	15
2.3.11 Requirements on external systems . . . . .	16
2.4 Implementation . . . . .	16
2.4.1 Calorimeter trigger . . . . .	17
2.4.1.1 Front-end preprocessor . . . . .	17
2.4.1.2 Cluster Processor . . . . .	18
2.4.1.3 Jet/Energy-sum Processor . . . . .	18
2.4.1.4 Demonstrator programme . . . . .	19
2.4.2 Muon trigger . . . . .	20
2.4.2.1 RPC-based subsystem. . . . .	21
2.4.2.2 TGC-based subsystem. . . . .	21
2.4.2.3 Muon-CTP interface . . . . .	21
2.4.2.4 Demonstrator programme . . . . .	21
2.4.3 Central trigger processor and TTC system . . . . .	21
2.5 References . . . . .	22

<b>3</b>	<b>Calorimeter trigger requirements and environment.</b>	<b>25</b>
3.1	References	27
<b>4</b>	<b>Calorimeter trigger algorithms and performance.</b>	<b>29</b>
4.1	Introduction.	29
4.2	Electron/photon trigger	29
4.2.1	Granularity and algorithm	29
4.2.2	Declustering and regions of interest	32
4.2.3	Choice of trigger cluster size	33
4.2.4	Choice of isolation regions	36
4.2.5	Overall trigger performance	41
4.2.6	Dynamic range required	44
4.3	Hadron/tau trigger	45
4.3.1	Motivation	45
4.3.2	Algorithms considered	45
4.3.3	Evaluation of candidate algorithms	46
4.3.3.1	Core algorithm	47
4.3.3.2	Isolation	49
4.3.3.3	Absolute trigger rate	50
4.3.4	Conclusion	51
4.4	Jet trigger.	54
4.4.1	Granularity and algorithm	54
4.4.2	Choice of algorithm options.	56
4.4.3	Inclusive trigger performance	57
4.4.4	Spatial resolution and jet separation	58
4.4.5	Multijet trigger performance	59
4.4.6	Low- $E_T$ RoI reconstruction	60
4.4.7	Signal resolution and dynamic range	62
4.5	Missing transverse energy and total transverse energy triggers	66
4.5.1	Description of the simulation	66
4.5.2	Results of the simulation.	67
4.5.2.1	Missing- $E_T$ resolution.	67
4.5.2.2	Number of bits used for signal transmission	69
4.5.2.3	Adder tree.	69
4.5.2.4	Rapidity coverage of missing- $E_T$ trigger	69
4.5.3	Trigger rates at level-1	71
4.5.3.1	Rates in different processes	71
4.5.3.2	Contributions to missing- $E_T$ from QCD jet events	71
4.5.3.3	Rates for physics processes with missing- $E_T$	73
4.6	Other trigger possibilities	74
4.6.1	Localized energy in the FCAL	74
4.6.2	Total jet transverse energy	74
4.6.2.1	Introduction	74
4.6.2.2	Multiplicity-based estimator	74
4.6.2.3	Performance of the estimator	75
4.6.2.4	Conclusions and preferred solution	79
